

# Tom Atkins

Blockchain Developer

## Profile

Passionate about the blockchain Industry, always expanding and learning. I am looking forward to joining the team and collaborating.

## Employment History

### Blockchain Developer at Bule Gila, Bali, Indonesia

December 2021 — February 2022

A short collaboration. The purpose was to create an NFT ERC721 Smart Contract as an Incentive to invite original Investors to further contribute. The initial Developer had left the team with a Simple ERC20 Smart Contract. This project is one of many for the CEO and has been put on hold.

## Education

### Bootcamp, Dapp University, Remote

June 2021 — December 2022

Complete development of a decentralized exchange and ERC20 token. Using Solidity, Truffle Suite, Web3JS, ReactJS I created the token and exchange. It is fully functioning and deployed to the rinkeby test network.

### Bootcamp, Eat The Blocks, Remote

June 2022 — December 2022

A bootcamp comprised of 30 Smart Contracts. Starting from simple storage type through to advanced. The focus was solely on Solidity Smart Contracts with very simple bootstrap for the front end. A great resource for future development.

### React / Redux / JS / NodeJS, CodeCademy, Remote

December 2020 — June 2021

Leveraging CodeCademy for their great learning material. I completed the mentioned certificates to become proficient in said languages and libraries.

### HTML / CSS / JS, FreeCodeCamp, Remote

December 2020 — June 2021

The introduction to my development career. I completed the 300+ hour modules in HTML/CSS/Responsive Web Design as well as JavaScript course.
